

Seminar: Stress effects on the cortical circuits: impact, prevention and rescue

**Presentation by Yi Zuo, PhD
of UC Santa Cruz**

May 4th, 2022 at 2pm ET

Join us on Zoom!

Meeting ID: 961 6310 2534

Dr. Yi Zuo received B.S. in Biology from Tsinghua University in China, and Ph.D. in Neuroscience from Northwestern University in the United States. She received postdoctoral training at New York University and the University of Texas at Austin, before joining the faculty of the Department of Molecular, Cell and Developmental Biology at University of California Santa Cruz in 2007. Dr. Zuo received the Committee on Women in Neuroscience Career Development Award in 2006 and was a Sloan Fellow (2007), an Ellison Medical Foundation New Scholar (2007), and a finalist for the Blavatnik National Award for Young Scientists (2015). She has been teaching the Neurobiology summer course at the Marine Biological Laboratory, Woods Hole, MA since 2006, and directing the Advanced Neuroimaging Techniques winter course at the Max Planck Florida Institute for Neuroscience since 2016. Dr. Zuo's lab studies how experiences affect mammalian neural circuits through synaptic modifications, and investigates its implications for neurological and psychiatric disorders, using *in vivo structural and functional imaging, mouse genetics, and mouse behavioral analysis*.
